

Go greener, with Gas.

Save energy. Save money.

For **FREE** advice on a new heating system, or to arrange for a free 5-point health check for your existing system, call The Energy Centre on 755577. Alternatively, log on to jsygas.com and go to on-line services to arrange an appointment.

Remember, you can also ask your own competent Corgi installer for a quotation and still get your boiler at half-price.

The energy that works 24/7

For all users of gas (whether on mains or from bottles) it is comforting to know there is a low rate tariff that works for you 24 hours a day, making gas even more economical and a competitive choice for anyone wishing to enjoy the advantages of gas for cooking, real flame fires, central heating and hot water.

Free Home Energy Saving Pack**

1 Free Standby Saver

Standby Saver cuts 100% of the standby power used by TVs, Hi-Fis, VCRs, DVDs, PCs and peripherals, saving you up to £37.00 per year. Standby Saver is a six-way electrical extension with two 'switchable' sockets, which can be in Standby Saver control or permanently switched on.

2 Free Smart Meter

The Eco-Eye smart meter very simply connects directly to your electric service and constantly monitors the amount of electricity coming into your home, clearly displaying your usage in kilowatts or in cost and is a visual reminder to think about how much power you are using.

3 Heatkeeper® Energy Saving Radiator Panels

In a typical centrally heated room, much heat is lost into the wall behind and above the radiator, the Heatkeeper Radiator Panels reduce this loss and help distribute the warm air around the room.

4 Five Free Low-energy Light Bulbs

You can save up to £6 a year on your electricity bills when you replace one standard bulb with a low-energy bulb.
